

AttLis 2020

Storrs, CT, USA

March 17-18

The Attentive Listener in the Visual World

Invited speakers

Elika Bergelson
Duke University

Craig Chambers
University of Toronto

Mike Tanenhaus
University of Rochester

Mila Vulchanova
*Norwegian University of
Science & Technology*

AttLis addresses multi-modal cognition with an emphasis on the interaction between language and vision. More specifically, there is a central focus on how attentional and visual processes interact with spoken and written language processing. Why are attention and vision crucial to language comprehension? How does each inform and mediate the other in moment-to-moment processing and in language development over the lifespan?

This will be the seventh AttLis meeting, and the first in North America.

AttLis is scheduled between two nearby meetings:

the [CUNY Human Sentence Processing Conference](#) (UMass-Amherst, 3/19-3/21),
and the [Cognitive Neuroscience Society](#) (Boston, 3/14-3/17).

Early registration deadline: 2/29/2020
